About Heightsafe

Heightsafe has grown exponentially since its inception in 2009, from a two-man serviced office to its current 15,000-square foot central operations base, boasting a wealth of longstanding, loyal, blue-chip business clients and employ over 80 staff.

Heightsafe is a family run business providing specialist height access and safety services, products and advice on a nationwide scale and in recent years expanding into Europe.

With a key focus on advances in technology, Heightsafe offer clients a personable and bespoke service by ensuring transparency through in-house client management software, raising the bar in health & safety standards.

More clients are choosing Heightsafe to install, test and repair their systems due to Heightsafe's superior service and commitment to client satisfaction.

Part of the Kee Safety Group

Heightsafe have recently been acquired by the Kee Safety Group – a leading global supplier of fall protection solutions, safety railing systems, and safe access equipment for working at height.

Kee Safety is a global company with business units in the UK, USA, Middle East and Asia. Heightsafe are now a part of a global supply chain, with access to a huge product range and the ability to design and create bespoke systems for any project.

From the original Kee Klamp fittings to an expanding portfolio of products including Kee Guard, Kee Walk and Kee Line, Heightsafe are able to provide an unrivalled service and competitive pricing in an ever-increasing market.

- ✓ Rescue, Winches & Stretchers

Case Study

CAF Newport

Heightsafe's specialist team installed and commissioned two Overhead fall arrest tracks on the upper structure of the CAF Newport facility, consisting of two 150m fall arrest lines overhead the train bays. The fall arrest lines allow up to four operators to work efficiently on the trains, providing complete flexibility for expedited inspections or repairs.

The flexibility of the system increases not only the effectiveness of the operations at CAF Newport but also assures the absolute safety of all operators working in the facility.

Our Clients

Don't just take our word for it ...

"I decided to once again use Heightsafe Systems due to my previous dealings with the company, and would again have no hesitation in employing them for future works."

Once again they were efficient with a professional approach to H&S, which is critical in our line of work. The quality of work that was provided at a competitive cost was second to none, the communication, RAMS and Operatives on site were a credit to themselves."

Accreditations

Heightsafe hold a wide range of accreditations and memberships to ensure continuous improvement of service delivery.

Heightsafe are proud to be members of professional bodies within the industry and are dedicated to providing clients with the highest quality products and services, whilst obtaining a key focus on best practice, Health and Safety and value for money.
